EDUCATION

Federal University of Technology, Akure

Akure, Ondo

B.S. in Urban and regional planning

Expected Graduation, May 2026

- **Related Coursework:** Statistics & Applications, 3d Development, AutoCad Designs and Development

EXPERIENCE

ArchiSaint Nexus

Feb 2025 – May 2025

Frontend Development Engineering Intern

- Built the frontend of an authentication system for a startup using **Next.js** and **TypeScript**, integrating responsive UI components and handling user flows
- Integrated with RESTful APIs to manage authentication logic, including login, signup, and session validation.
- Collaborated with backend developers to ensure seamless data exchange and improve user experience across devices

Four Devs Agency

Jan 2025 – May 2025

Frontend Developer

- Developed visually engaging and responsive websites for clients using **React** and **Tailwind CSS**, focusing on performance, accessibility, and cross-device compatibility.
- Collaborated with designers and project managers to transform Figma mockups into pixel-perfect web experiences.

ALLFORONE

Apr 2024 – May 2024

Web3 Frontend Developer - Contract

- Built a marketing and token launch website for a Web3 company using **React**, **CSS**, and **Framer Motion** to deliver a sleek, animated user interface.
- Integrated **RainbowKit** and **wagmi** to enable seamless wallet connections and on-chain interactions.
- Collaborated with the team to highlight token utilities, roadmap, and real-time Web3 features in a responsive and visually compelling sitemetrics.

PROJECTS

Tasky - [Live Preview](#)

Fullstack Developer

- Built **Tasky**, a collaborative task management web app using **Next.js**, **Tailwind CSS**, and **DaisyUI** to enable real-time task creation, assignment, and status tracking
- Developed a RESTful backend with **Node.js** and **Express**, supporting user roles, access control, and project-level collaboration
- Integrated AI-powered task recommendations based on users' hobbies and available time, enhancing productivity and personalization

MyEstate – [Live Preview](#)

Fullstack Developer

- Developed **MyEstate**, a full-stack real estate web application using **React.js**, **Vite**, and **Tailwind CSS**, allowing users to browse property listings and contact sellers
- Built a backend with **Node.js** and **Express**, implementing listing creation, user authentication, and seller-buyer communication logic
